

Developed in Alignment with the VITA and SOSA™ Technical Standards

3 PHASE. 3U. 1 CHOICE.

THE MILITARY FLIES HIGH WITH VPXtra 704™

When the mission calls for a 3-phase 3U power supply that can stand up to the most rugged environments, the military chooses VPXtra 704™ from Behlman – the only VPX solution of its kind built to operate seamlessly from MIL-STD-704F power for mission-critical airborne, shipboard, ground and mobile applications.

- > 3-phase AC or 270V DC input; high-power DC output
- > Available holdup cards store 700W of DC power for up to 80 msec
- > Overvoltage, short circuit, over-current and thermal protection
- > Provides full output performance during both normal and abnormal transients
