3U VPX High Power Dual-Output Power Supply (VITA 62.0)

The Behlman VPXtra®500DW-IQ1 COTS DC to DC power supply is a rugged, highly reliable, switch mode unit developed in alignment with the SOSA™ Technical Standard for high-end industrial and military applications. The VPXtra®500DW-IQ1 is a 3U VPX power supply that delivers up to 482 Watts of DC power via two outputs. Both outputs may be paralleled for higher output power and/or redundancy, with active load sharing provided for each. The VPXtra®500DW-IQ1 accepts 28 VDC input IAW MIL-STD-1275E and provides full performance through all transient conditions including initial engagement / cranking and overvoltage surges and spikes as well as MIL-STD-704F including operation through both normal and abnormal overvoltage transients; performance through undervoltage transients below 10.5V and power interruptions requires a separate energy storage module. The VPXtra®500DW-IQ1 also contains a VITA 46.11 compatible IPMC for integration with system management functions.

The VPXtra®500DW-IQ1 power supply has no minimum load requirement and has overvoltage and short circuit protection as well as over current and thermal protection. The power supply is designed to support the rigors of mission critical mobile vehicle, airborne and shipboard applications.

Designed and manufactured with *Xtra-Cooling*, *Xtra-Reliable* Design and *Xtra-Rugged* construction makes the Behlman VPXtra®500DW-IQ1 your best choice.
